

AI

Artificial Intelligence & Healthcare

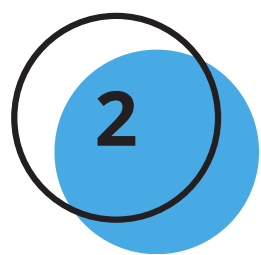

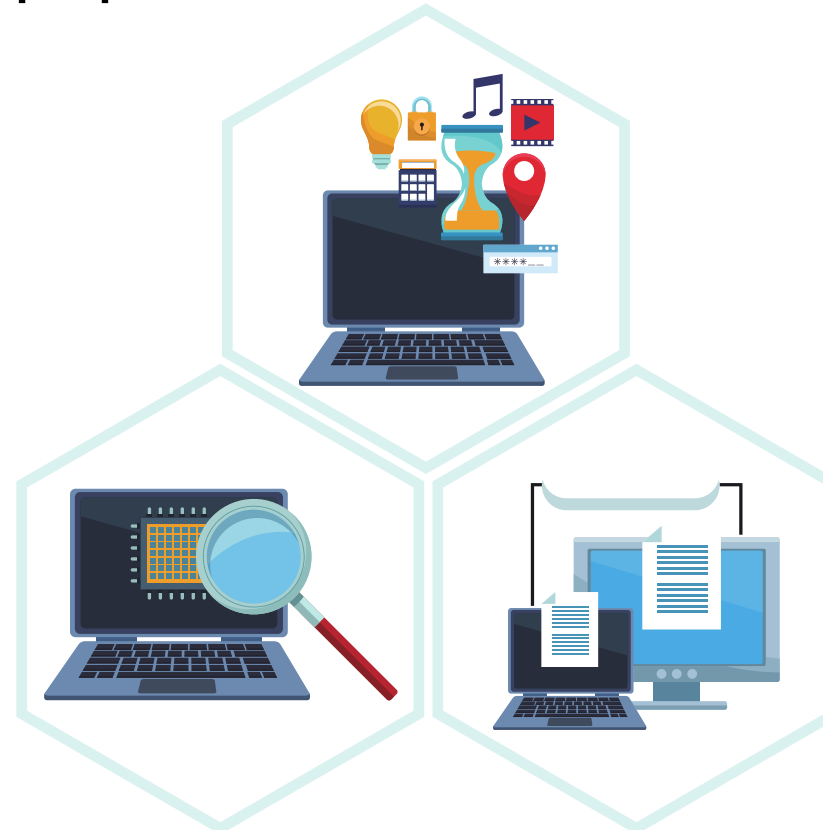

Artificial Intelligence (AI)

Artificial Intelligence (AI) is when computers and technology help with tasks that usually need human thinking.

At Langs, AI helps our team give more personalized care and reduces paperwork, so staff have more time to focus on helping people.

Benefits of AI in Healthcare

Efficiency

AI speeds up tasks for smoother team operations.

Improved Accuracy

AI supports note-taking, reducing errors and helping clinicians focus on clients.

Accessibility

AI makes healthcare services and information easier to access.

How is your health information protected?

- **Confidentiality:** Only certain people can see your health information.
- **Encryption:** Your data is turned into a secure code to keep it safe.
- **Regulations:** Strict laws like PHIPA and PIPEDA are followed, making sure your information is handled securely.
- **Regular Audits:** Systems are checked regularly to make sure they are safe.

Questions?

Please get in touch with your healthcare provider if you have any questions or need further information.
